MULTISENSOR WITH SELFVERIFY - BH-520/N

Interactive fire detection systems
Product Datasheet

Technical specifications and instructions

Features

- Interactive
- Multisensor detectors ensure fast response to various fire developments
- Smoke detector for detection of combustion gases mainly consisting of visible (large) particles. Heat sensor assisted for early detection of flaming fires
- Comprises DYFI+ adaptive and self learning function
- With SelfVerify function for reduced maintenance/testing and increased reliability
- Built in thermistor for reading of temperature at the detector point
- Selective towards misleading environmental phenomena that in a traditional system would lead to an unwanted fire alarm
- Short circuit isolator in each detector
- Additional coating of PCB
- Automatic addressing
- Proven technology
- Designed to meet the requirement of the major maritime classification societies
- Comprises a built in indicator (LED)

Description / Application

BH-520/N is designed for use with Autronica's interactive fire detection systems. A rise in temperature will change the detection platform by increasing the smoke sensitivity in order to improve the detection of combustion gases from flaming fires producing barely a minimum of visible smoke particles. The MultiSensor principle combined with advanced signal processing in the detector ensures an early response to any type of fire development.

The detector is for use in hazardous area zone 2. It must be connected to a loop driver approved for zone 2.

Additional coating of PCB combined with the adaptivity and the allround smoke sensitivity of BH-520/N makes this detector suitable for industrial, maritime and offshore applications where there is a potential flaming or/and smouldering fire hazard.

Principle

Dual - 2 - sensor detector. Photoelectric, operating on the light scatter principle and temperature measurement by means of a thermistor.

SelfVerify: the detector's ability to initiate alarm at correct amount of smoke is regularly checked.

Versions

- BH-220*   MultiSensor, standard
- BH-320*   MultiSensor with SelfVerify
- BH-520*   MultiSensor with SelfVerify, environmentally protected
- BH-520/EX*   MultiSensor with SelfVerify, Ex ia version for use in zone 0, 1 and 2
- BH-520/N   MultiSensor with SelfVerify, Ex ic version for use in zone 2
